Electric Counterbalanced Forklift
FEP-100N2

NOBLELIFT INTELLIGENT EQUIPMENT CO., LTD.

System compatibility and unique style

Flexible battery options:

Lithium or lead-acid, choose as needed.

Integration:

Combines the performance of internal combustion with the efficiency and comfort of electric forklifts.

High efficiency and Energy-saving

Dual-drive power, imported motors, wet brake, which not only provides strong power but also further enhances the forklift's safety and stability.

- Dual-gun charging for fast, efficient power-up.

The lithium battery forklift comes equipped with dual-gun charging, significantly reducing charging time. Featuring a high-capacity lithium battery, it offers flexible charging and usage, ensuring reliable, all-weather performance and continuous operation—perfectly suited for demanding heavy-duty applications.

- Multiple configurations, low energy consumption.

The parking brake button flashes different colors in parking and driving modes for easy operation.

Independent steering system, on-demand oil supply, reducing energy consumption.

LED lights are brighter, more durable, and energy-efficient.

Dual front tires with enhanced loading capacity.

Intelligent Safety

- **Intelligent Automatic Parking:** Regenerative braking system design, active parking in multiple scenarios, standard rearview camera, ensuring safety and peace of mind.
- **Intelligent Turning Speed Limit:** Active speed limiting function, balancing efficiency and safety during high-speed turns.
- **Intelligent Limit Buffering:** Mast lifting and lowering with intelligent sensing, preventing impact at the limit, ensuring safety and comfort.
- **Intelligent Operation Protection:** Full OPS system to prevent wrong operation and ensure safety.
- **Intelligent Control Strategy:** Dual-core controllers, meeting the latest EU safety standards.

The forklift comes standard with a rearview camera, enhancing overall safety performance.

The overhead guard with integrated top cover design increases strength, ensuring safety.

Standard color screen display shows key information such as forklift speed, working hours, battery charge, fault codes etc.

Easy Maintenance

The battery is centrally positioned with side access, making it easy to switch between lead-acid and lithium batteries, meeting the needs of different users and applications.

The front and rear covers open at a wide angle, making daily inspections and maintenance easier.

Optimized layout, balancing heat dissipation and ease of maintenance.

Fully open design, making hydraulic oil filling more convenient.
